App Topic

MUVITOO was derived from the word "Moving to a Movie", which means "you can easily move to watch a movie regardless of who you are, where you are, and what you do. The interesting thing about this app is its ease of usage. The app is designed to be used by anyone irrespective of their level of education.

A film also called a movie or a motion picture is a series of still photographs on film projected onto a screen using light in rapid succession. The optical phenomenon known as the persistence of vision gives the illusion of actual, smooth, and continuous movement.
